

BHARAT DAP

(46% Phosphorus + 18% Nitrogen)

Features of DAP

- Bharat DAP is an imported product made in top quality factories of the world.
- Bharat DAP contains 18 percent nitrogen and 46 percent phosphorus in each grain.
- It is made available to the farmers only after thorough quality check at every level.

Bharat DAP's role in plants

- Bharat DAP plays an important role in speeding up crop ripening, nitrogen fixation in pulse crops and overall development of plants.
- Bharat DAP is helpful in the development of plant roots, strength of stem, formation of flowers and seeds etc.

The consequences of phosphorus deficiency

- Due to lack of phosphorus, the growth of the plants stops from the very beginning and they remain dwarf and small.
- The leaves of the plant become dark green or blue or purple.
- Leaves start falling at an immature stage and flowers and fruits also appear late than normal.

Bharat DAP is available in every area of your state.

Lakhs of farmers in different states are taking benefit by using Bharat DAP.
